MR

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a method of making a plastic closure, classified in class 264, subclass 500+.
 - II. Claims 9-11, drawn to a plastic closure, classified in class 428, subclass 35.7.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed in Invention II can be made by another and materially different process without the steps of the Group I process i.e. compression molding a liner in situ onto the base wall and peripherally within the lip etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Robert Collins on 6/17/04 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action.

Claims 9-11 stand withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Collins on 2/6/05.

The application has been amended as follows: Claims 9-11 are canceled because they were drawn to a non-elected invention and the application is otherwise in condition for allowance.

Allowable Subject Matter

3. Claims 1-8 are allowed. The following is an examiner's statement of reasons for allowance: The claims are allowable because the claims are drawn to a process of making the patented product of patent number 6,660,349 and the process claims include all of the limitations of the claims drawn to a product in parent US patent 6,660,349. In accordance with *In re Ochiai*, the process of making is deemed allowable. *In re Ochiai*, 71 F.3d 1565, 37 USPQ2d 1127 (Fed. Cir. 1995). See MEPE §2116.01.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
